

Soniseal™ 40 UL Series

Rotary Ultrasonic Sealing Systems for Packaging

The **Soniseal™ 40 UL Series** is a versatile, high-speed, ultrasonic solution for close-to-product sealing over a broad range of film compositions.

- Lightweight, low cost
- Bond widths up to 25 mm
- Speeds up to 152 mpm
- Single drive designs
- Easily integrates into existing machine configurations
- Excellent seal consistency and control over a broad range of materials and process conditions.
- 40 kHz system
- 600W or 1200W power supply
- Offers precise control of seal during start-stop conditions

The ultimate rotary solution for your application is one that works seamlessly with your materials and your processes. We can help you achieve that objective, whether with a pre-engineered platform or a complete custom solution.

No one knows rotary ultrasonic technology better. And no one listens, innovates and delivers a better solution. Bring your packaging challenges to Aurizon!
